Principal's Messages

Congratulations to the Wongi for turning 40 this month! Over the last three years I have been privileged to meet the volunteers and contributors who keep this publication going each week. They provide a wonderful service to the community and I would like to officially thank our volunteers for their tireless work. Our school has a very valued partnership in supporting the publication of Wongi and will continue to support its publication in the coming years. Well done to all volunteers, past, present and emerging.

Sustainability Grant!

Our school is excited to announce that we have won a \$15000 sustainability grant! We will be using this grant for native plantings in the school, building and installing wildlife boxes, labour and the expansion of the bush tucker gardens and vegetable gardens. We hope to create a love of nature with our students and increase their knowledge of sustainability through worm farming and composting as well. We aim to create biodiverse gardens to encourage native critters to visit, such as lizards, frogs, butterflies and native birds. We are looking forward to sharing our learning journey with the community.

P & C News

All P & C positions are vacant and we have asked for parents and carers to indicate if they are interested in joining the committee. If you have not sent your note back to school indicating your interest, please do so promptly. If we have renewed interest, we will have another meeting shortly. Until then, the canteen remains closed.

Art Workshops Ahead!

Each term we will be running Visual Arts workshops for students across K-6. I will be teaching each workshop and I am looking forward to providing these opportunities each term. In visual arts, students learn observation skills, ways to express their ideas visually, self-discipline and perseverance. Through drawing, sculpture, painting, printing and so on, students have a way to develop their self-esteem.

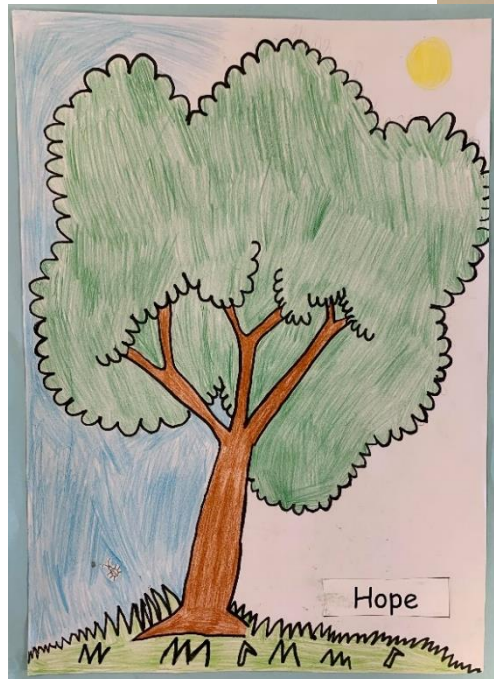

Assembly

Next week, we will have our first assembly in the school hall on Thursday at 2.15pm. Parents, carers, grandparents, friends and family members are all welcome to attend. Toddlers and students not attending school must remain with parents and not sit with the school students as this can be very disruptive and are the responsibility of their carers throughout the assembly. If your child is receiving an award we will text you on your mobile this week. It is very important we have the correct details, so you receive our messages. Please contact the school if your mobile phone number has changed recently. All classes present work and it is a great way of finding out about what students are learning about and up and coming events. We hope to see our parents and families there!

News from Mr Svenssek

Year 3 and 4 have begun this year with an amazing attitude towards their learning which has been shown through their effort in Science and Creative Arts. We have been studying what a rainforest is and how there are many different types of rainforests. Year 3/4 created their own versions of a healthy, tall and strong tree which could be found in a rainforest. They used crayons, oil pastels, pencils and textas to create these excellent artworks.
