2023 Term 3 Week 9

Digital Support Visit

Last week we were lucky to have Kate Jones and Michael Morgan from the DET Digital Support Team, visit our school for three days. They worked closely with Mrs Wheeler, providing her with tools, strategies and resources to embed technology into everyday learning. Staff also participated in class sessions and 1:1 conversation around how to incorporate digital skills into each classroom in a meaningful way.

Each class was taught by Miss Jones and Mr Morgan and learned different skills. They were impressed with how many skills each class already had!

- K/1 participated in programming and coding skills through the app Scratch Jr and Jamboard collaboration tool. Students learned to import an image and text into a Google Slide presentation.
- Year 1/2 were shown a maths warm up game called 'What's my card?' on Polypad. Students had great fun trying to figure out what card was hidden. They also learned how to code using the Blockly app progressing through increasingly challenging tasks.
- Year 3/4 created their own 'Choose your own adventure' type game using Google Forms. Then they began making their own class informative interactive app using Google Slides. They will finish this project with Mrs Wheeler.
- 4/5/6 were presented with the task of creating their own website on their favourite Australian animals. This will be completed with Mrs Wheeler and shared with parents. They also made their own maze type game using the Make Code app.

It was a fantastic three days, and everyone learned something new.
